AT STERLING EQUINE,
WE'RE NOT JUST CRAFTING
HORSE STALLS...

WE'RE
REDEFINING
THEM.

WHO WE ARE

We're proud to be at the forefront of setting a superior standard for the design and installation of custom horse stalls and stabling equipment.

Each of our designs are handcrafted with special attention to safety, comfort, security and visual appeal. Our expert team of consultants is committed to working with clients from start to finish, guiding barn planning and layout, equipment design, and installation.

This dedication to unparalleled craftsmanship, innovative design conceptualization, and incomparable customer service has quickly made us one of the top choices for outfitting equestrian facilities throughout the United States.

“Our experience with Sterling Equine was first class. The quality of their materials, workmanship, and their overall professionalism with meeting the needs of our show horses, has been exemplary.”

Jim Hagale, Hagale Family Arabians, LLC

THE STERLING ADVANTAGE

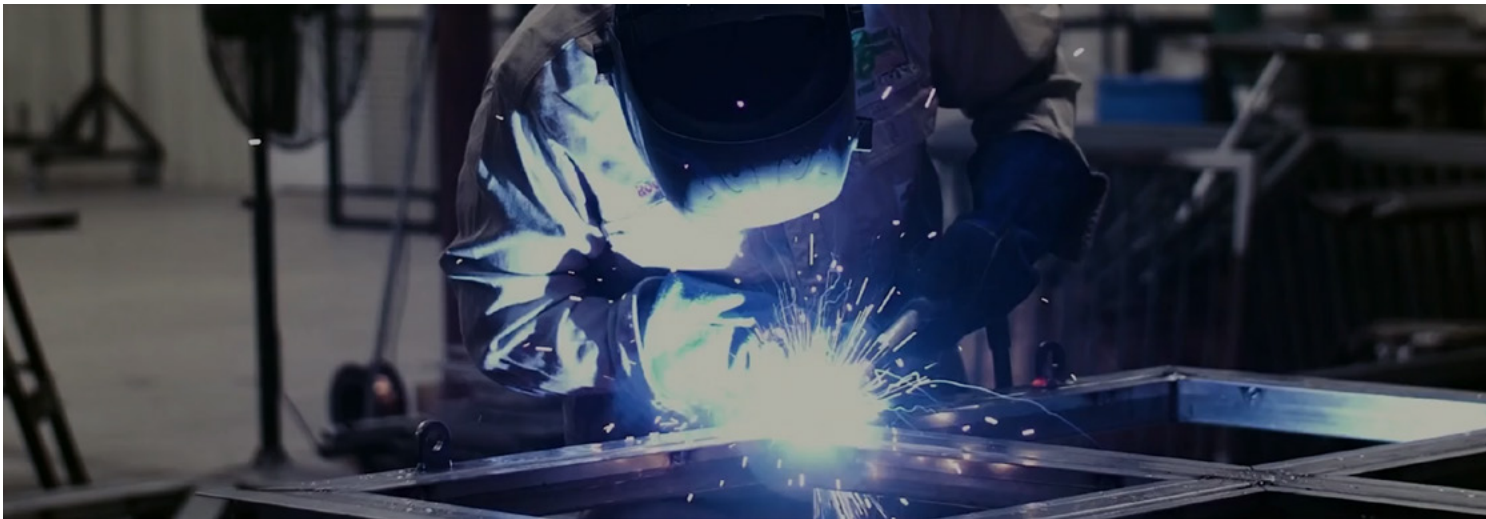

■ **QUALITY & CRAFTSMANSHIP**

Our stalls are handmade using only the finest materials available, including a galvanized steel known for its exceptional durability, and a powder finish coating that surpasses common industry standards. With Sterling Equine, you will receive uncompromised craftsmanship and an unmatched attention to detail.

■ **DESIGN & INNOVATION**

From the elegant curves of our stall fronts to our precision-engineered hardware, every element of Sterling Equine stalls is meticulously designed to be both beautiful and functional. We balance elevated aesthetics with safety and functionality in every detail.

■ **SERVICE & EXPERIENCE**

Our experienced team provides you with one-on-one support at every step of the process, from planning and design to ordering and installation. With unparalleled communication, including quick turnaround times on quotes, personalized consultations, and collaborative guidance, we're here to help your vision come to life.

■ **A FOCUS ON SAFETY**

Equine and human safety is at the heart of everything we do. Each Sterling Equine stall, barn door, and window is designed with the utmost safety in mind – from our designs made of premium materials to our rigorous quality control processes and procedures.

YOUR VISION

+ OUR CUSTOM DESIGNS & EXPERT GUIDANCE

Our team is here to help guide you through the stall design decision-making process, ensuring your unique needs are met every step of the way. Contact us to set up your complimentary stall planning consultation by email: info@sterling.one or phone: 573-328-2977.

CUSTOM STALLS

With Sterling Equine, the possibilities for creating your ideal stall system are nearly endless. One of the primary benefits of working with a custom stall manufacturer is the ability to customize almost every aspect of your stalls. We work closely with you to ensure your stall dreams become a reality.

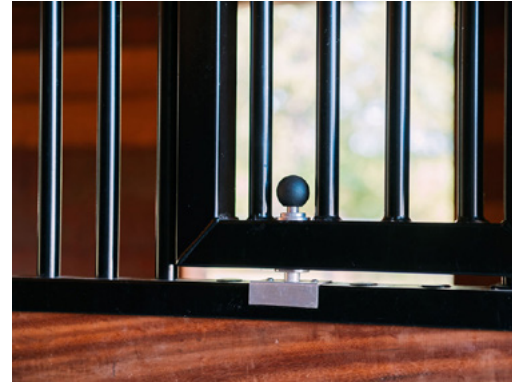

Some additional advantages to working with us include:

- A low-pressure process, from start to finish
- A high degree of flexibility
- Cost-effective production (custom does not always mean more expensive!)
- Superior staff expertise and customer service

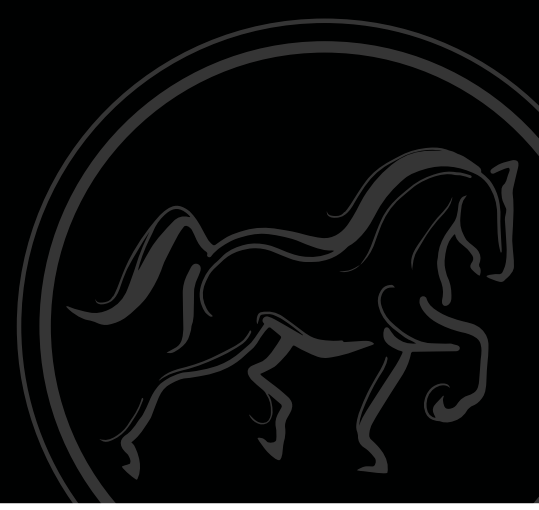

This dedication to unparalleled craftsmanship, innovative design conceptualization, and incomparable customer service has quickly made us one of the top choices for outfitting equestrian facilities throughout the United States.

CUSTOMIZATION OPTIONS

Feed Doors, Yoke Designs, Name Plates, Shavings Guard, Sizes, Colors, Dimensions, Fill Pieces, Latches

FREESTANDING VS. BUILT-IN STALLS:

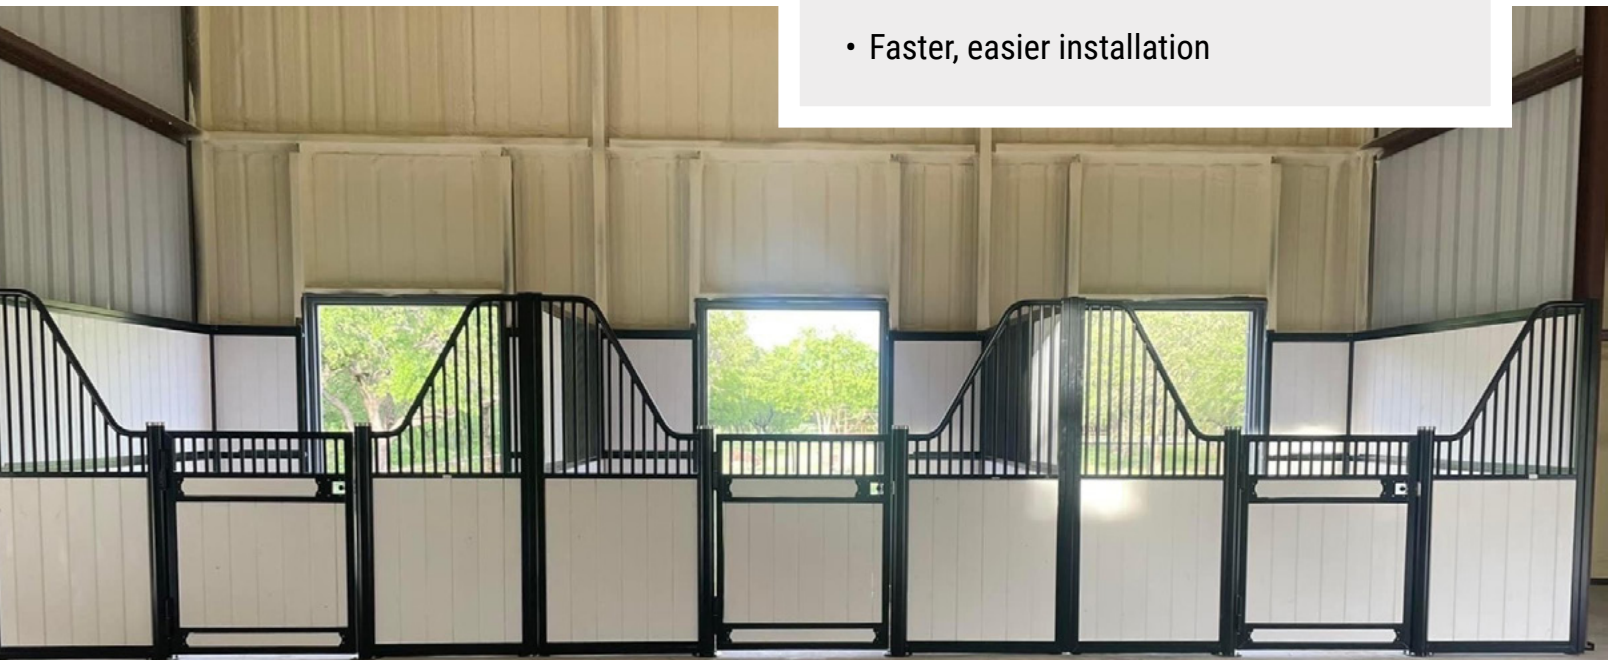

FREESTANDING STALLS

Freestanding horse stalls are a convenient option for those wishing to do less intensive construction, and can be designed in various sizes and configurations to accommodate your specific needs.

Features & BENEFITS

- May be used in nearly any clear span barn design
- No existing structure required
- No door posts necessary
- More versatile (may be set up by itself, within a structure or attached to posts)
- Can work in nearly any existing barn
- More stall front design options
- Faster, easier installation

WHICH CHOICE IS RIGHT FOR YOU?

BUILT-IN STALLS

Alternatively, built-in stalls can be tailored to fit the exact shape and style of your barn, whether built directly into a new barn structure or attached to existing components, providing a more cohesive and aesthetically appealing look.

Though they require more planning and construction than their freestanding counterparts, built-in stalls offer additional stability and dependability.

Features & BENEFITS

- Smaller sections are lighter and easier to handle
- Less expensive due to lower material input costs

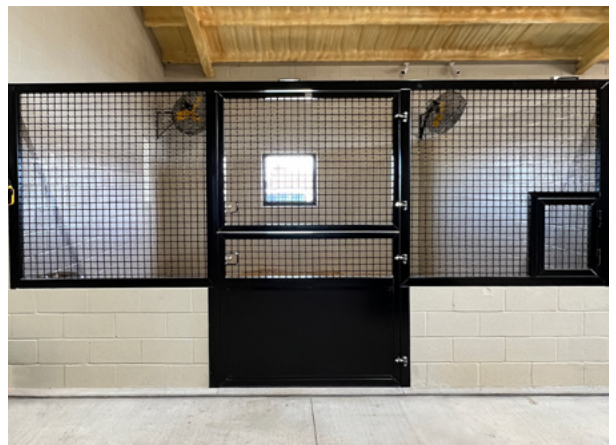

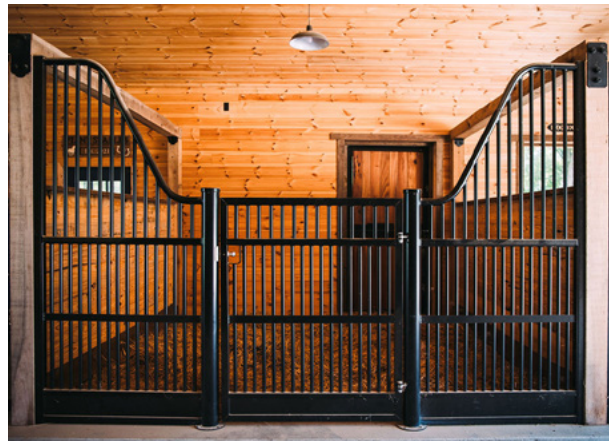

Making the decision between freestanding or built-in stalls will ultimately depend on your specific needs, overall budget and long-term facility plans.

Whether freestanding or built-in, each of our stall systems are entirely handmade by expert craftsmen and designed to last a lifetime. We use only top-tier raw materials, with extraordinary attention to detail in design and production. This includes:

- Exceptionally robust American-made galvanized steel tubing
- State-of-the-art pretreatment powder coating processes
- Industry-leading powder coating application, for exceptional beauty and durability
- 1" round bar grills for equine safety (spaced at 2.5" apart below 49" or 3" apart above 49")
- Heavy-duty galvanized steel mesh, welded into 2" squares

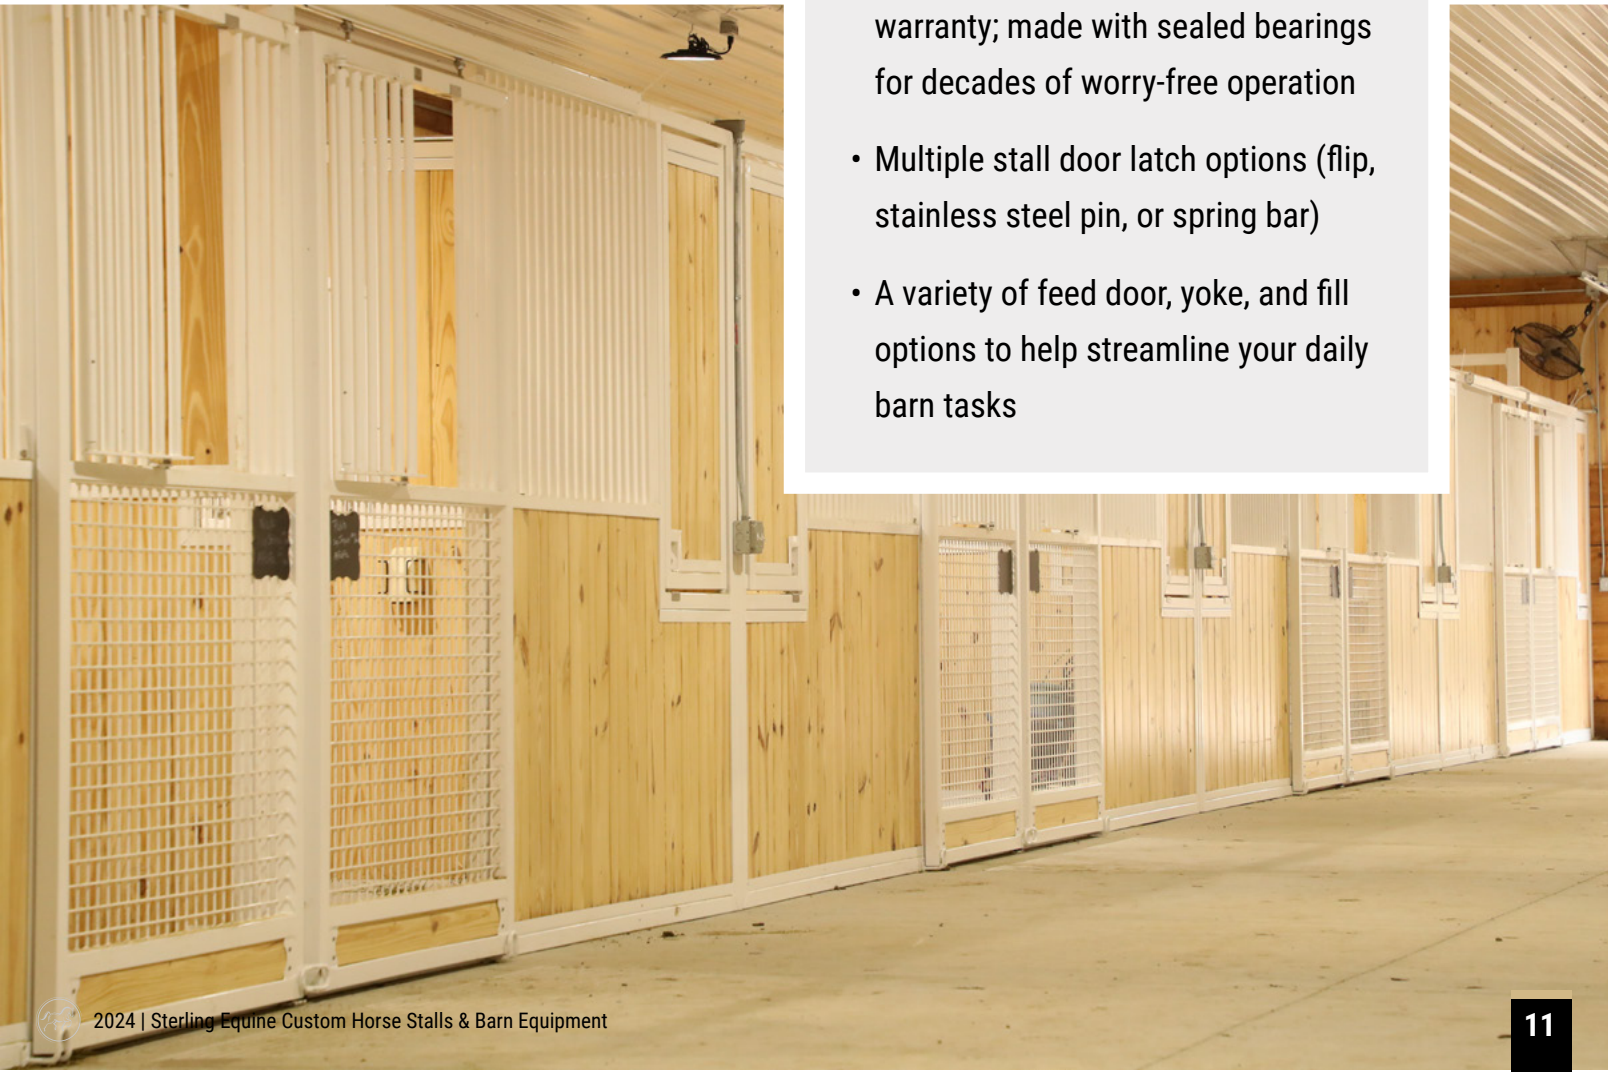

SLIDING DOOR STALLS

Our sliding door stall fronts feature a streamlined look and highly efficient use of space while maintaining a focus on optimal ventilation and safety.

Features & BENEFITS

- Functional and elegant stall fronts – the perfect choice for tight aisles and/or busy walkways
- A self-cleaning track system featuring rollers with a lifetime warranty; made with sealed bearings for decades of worry-free operation
- Multiple stall door latch options (flip, stainless steel pin, or spring bar)
- A variety of feed door, yoke, and fill options to help streamline your daily barn tasks

SLIDING DOOR STALL OPTIONS

**AVAILABLE IN FREESTANDING
OR BUILT IN OPTIONS**

You can completely
customize your stall design
and create your dream stall
configuration by making
the following selections.

*There is the option to purchase grillwork, doors
or track systems individually as components. For
more details on stall components see page 28.*

*All sliding stall configurations can be constructed
in a hinged door style.*

STALL COMPONENTS

Our stall components offer a versatile and completely customizable stall component system, allowing you to bring your ideal stalls to life.

Features & BENEFITS

- Select, customize and combine the exact stall components that will align with your unique vision
- Choose from our wide selection of sliding and hinged stall doors, grill work and mesh options, partitions, gates, latches, hardware, and more
- Offers premium grillwork, mesh, and gate designs, framed with traditional wood posts for a high-end finish
- Purchase specific hardware, u-channels, or track systems individually, as needed

ADDITIONAL PRODUCTS

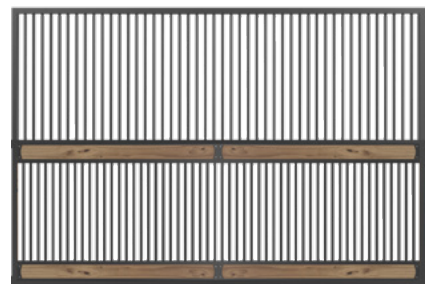

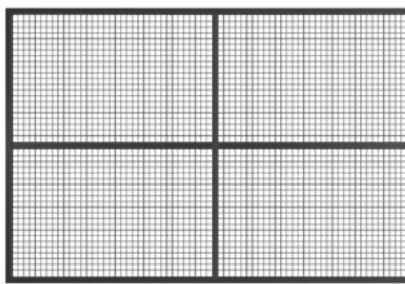

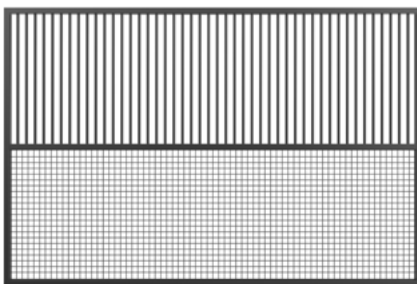

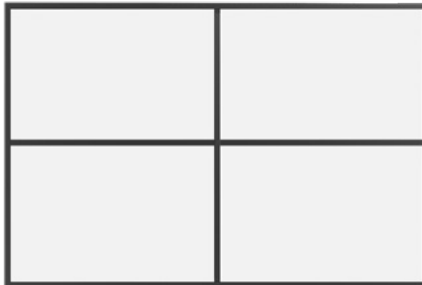

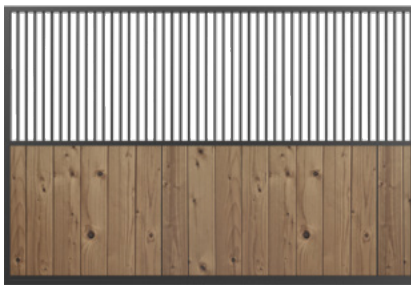

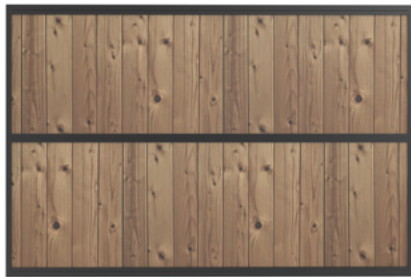

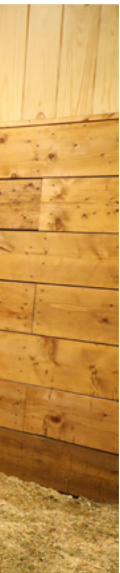

PARTITIONS

Sterling's partitions are simply an extension of our beautiful stall fronts. While their main function is to provide a safe divider between horses and stalls, our partitions are also truly aesthetically pleasing.

We offer a diverse range of configurations to assist clients with their distinct barn requirements. Ventilation, socialization, individual horse temperaments, and overall barn purpose are just a few of the topics we commonly discuss with clients during the selection process.

In addition to our custom stalls, we are proud to offer a variety of add-ons to accommodate nearly any related need.

BARN END DOORS

Barn end doors can be a real statement piece, creating a grand entrance to your equestrian paradise. At Sterling, our doors are recognized for combining high-quality construction with functionality and beauty that can be enjoyed for years to come. Let our team help you specially design a set of doors to reflect your style and the unique statement you want to make. These are offered as sliding doors or hinged.

Hinged Barn End Doors

Sliding Barn End Doors

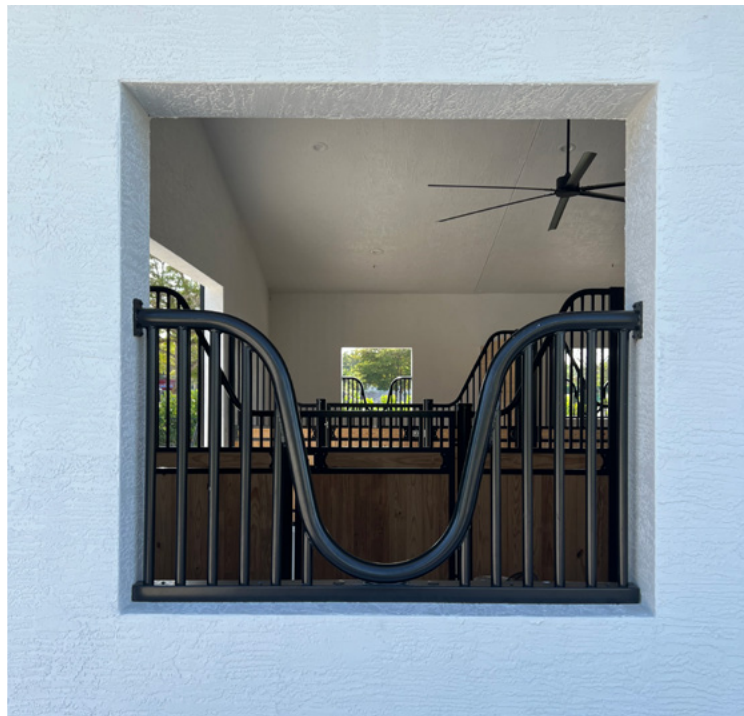

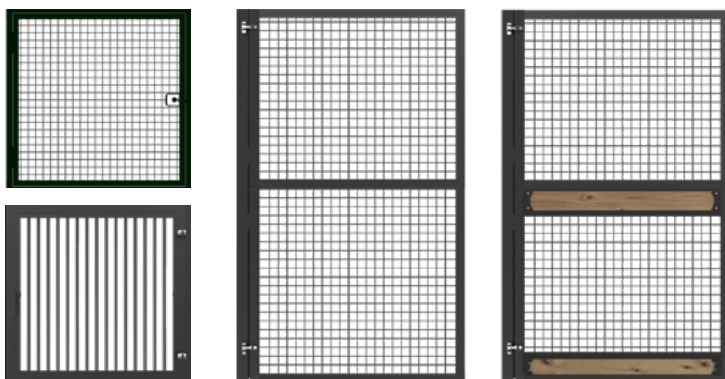

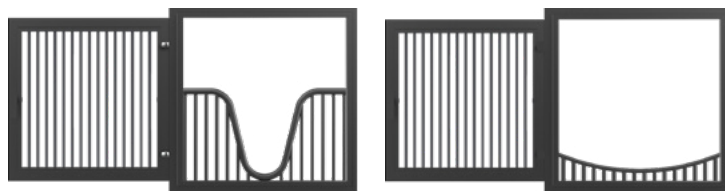

DUTCH/PADDOCK DOORS

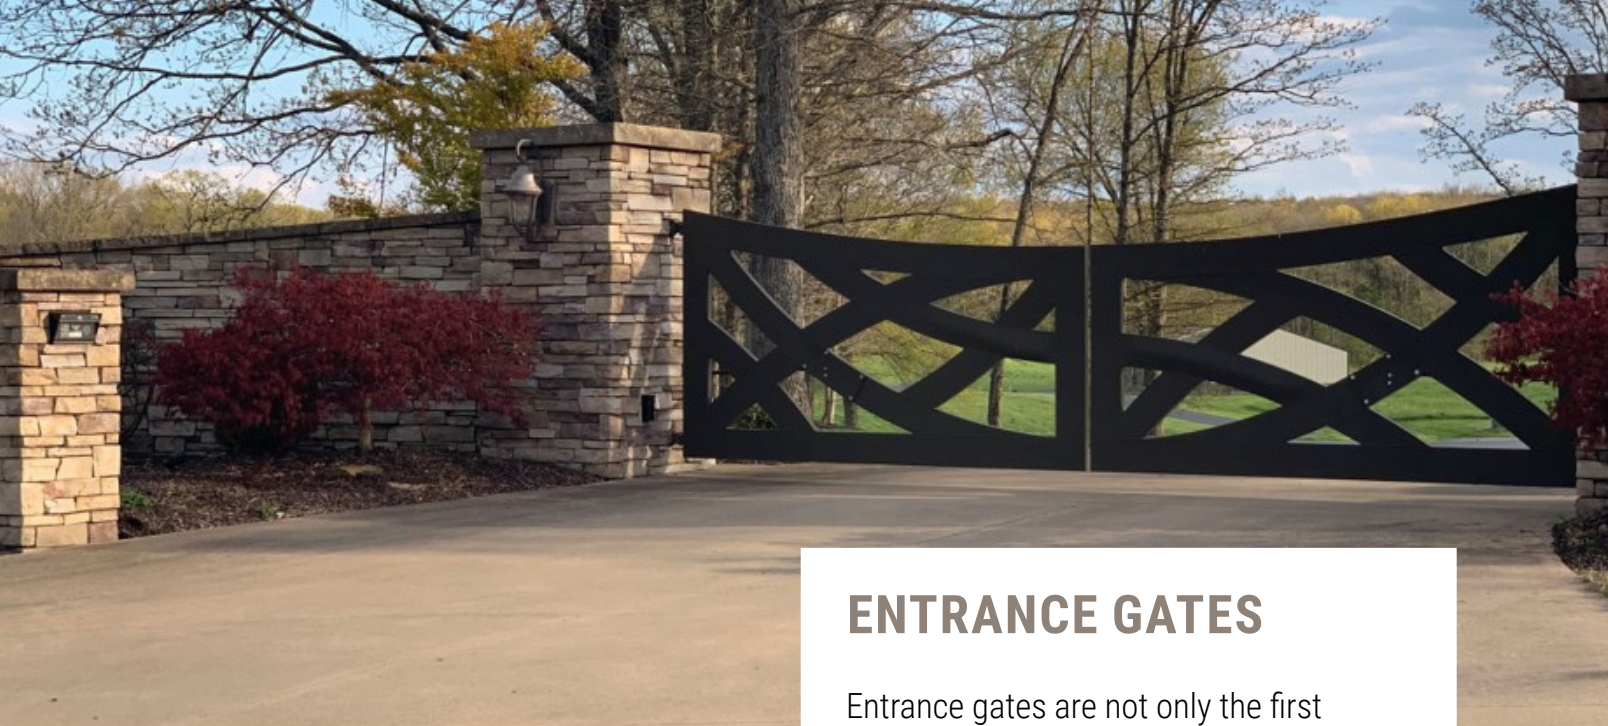

At Sterling, we offer a custom-formed galvanized door frame that will withstand the elements. High-quality, adjustable stainless steel hinges stop doors from sagging and our galvanized steel frames prevent warping. We also use a two-point contact cane latch to prevent bent lower doors, which are often the result of a high-powered kick. These are offered as sliding doors or hinged.

WINDOWS & GRILLS

Our windows safely invite light and air for stall occupants. From simple to sophisticated, window design will depend greatly on the desired aesthetic and barn style. We also offer window grill guards, yokes and shutters to complement the diversity of our window designs and your specific style choices.

ENTRANCE GATES

Entrance gates are not only the first impression of your facility, but an opportunity to make a statement that ties into your overall aesthetic.

We manufacture gates tailored to fit entryways for both commercial and residential facilities, built with the most reliable automatic gate operators on the market and the absolute best in raw materials.

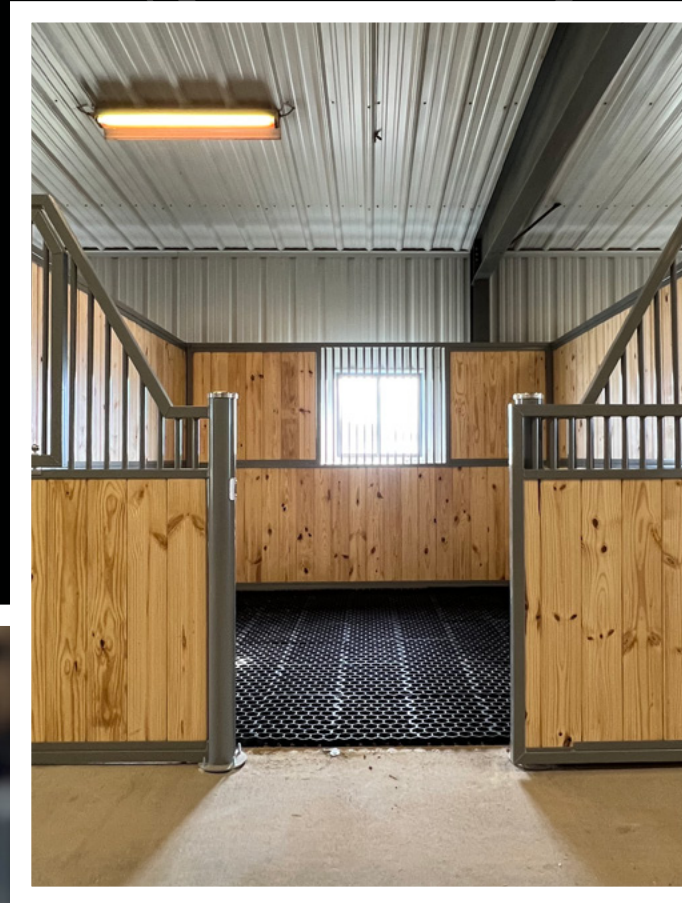

POWDER COATING

We pride ourselves on using only the highest quality powder coating options available. We use a TGIC polyester system for exterior applications, which offers exceptional UV protection. A powder coating is also applied to our pre-treated steel for the best application possible, so you can enjoy a beautiful finish for many years to come.

FLOORING

As horse owners know, the right flooring is instrumental to a safe and healthy environment, but what's right for some may not be the best choice for others. That's why we're proud to offer a variety of high-quality flooring options to suit your specific needs.

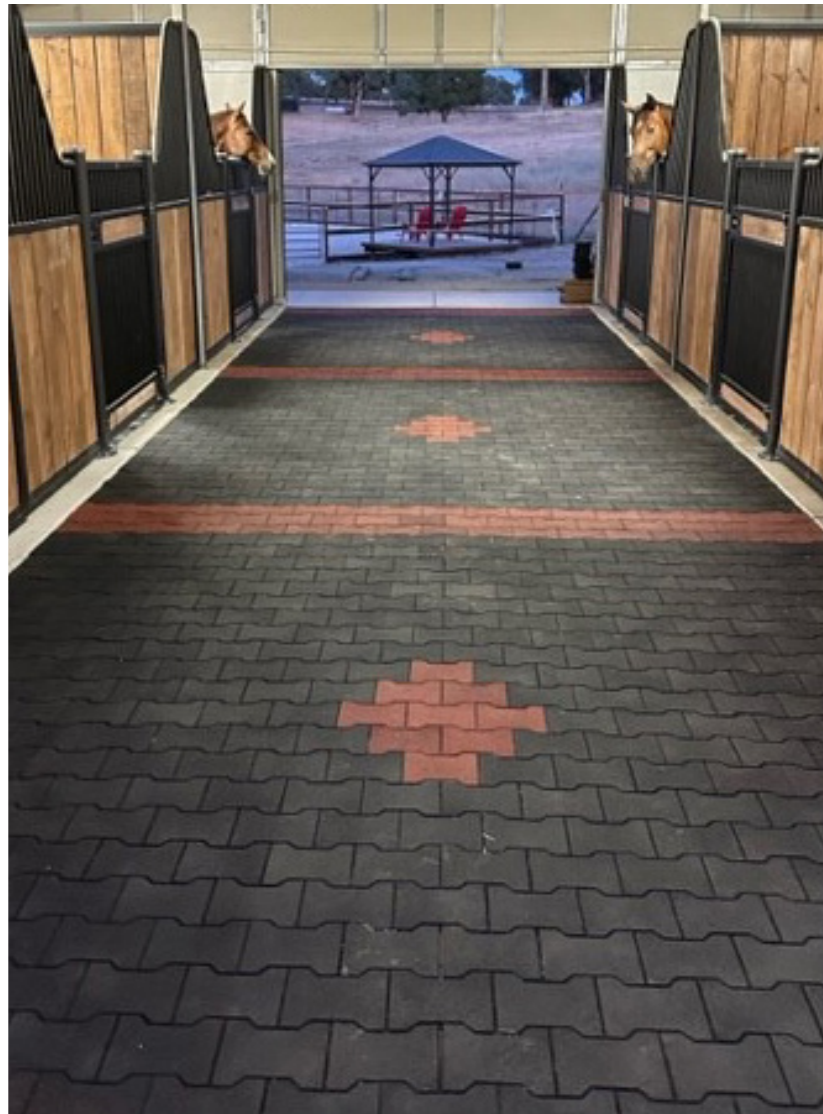

RUBBER PAVERS

Sterling Equine rubber pavers will add a finished, elegant look to your barn while providing a safe surface for horses to stand and walk on.

Why our paver is a cut above the rest:

- Made from a unique blend of rubber shred and crumb for enhanced durability
- Thoroughly colored so that wear does not contribute to discoloration
- Easily replaceable if damaged
- Non-slip
- Noise-reducing
- UV-resistant
- Cold-resistant
- Can be used on either concrete or crushed rock surfaces
- Comes in red, black or gray and 20mm or 40mm thicknesses

PERMAGRID

PermaGrid is a mud management solution for equine facilities. These mats may be used in a variety of high traffic locations, such as paddocks, stalls, riding arenas, exercise runs and feeding areas.

Features & BENEFITS

- Resistant to frost and UV damage
- Clever connection system locks each slab securely in place
- Quick, straightforward installation
- Lightweight design is easy to handle
- Low coverage for fast water drainage
- Dimensions: 19.5" x 15.75"

Installation Recommendations

For an all-weather grass surface with excellent mud control, install PermaGrid on a free-draining sub-base, backfill the area with topsoil and then seed or turf for use.

Or, for a gravel finish that's suitable for horses, install PermaGrid on a free-draining base. Fill the cells with a well-graded angular gravel (3/16–5/8") and compact.

THE STABLECOMFORT STALL MATTRESS

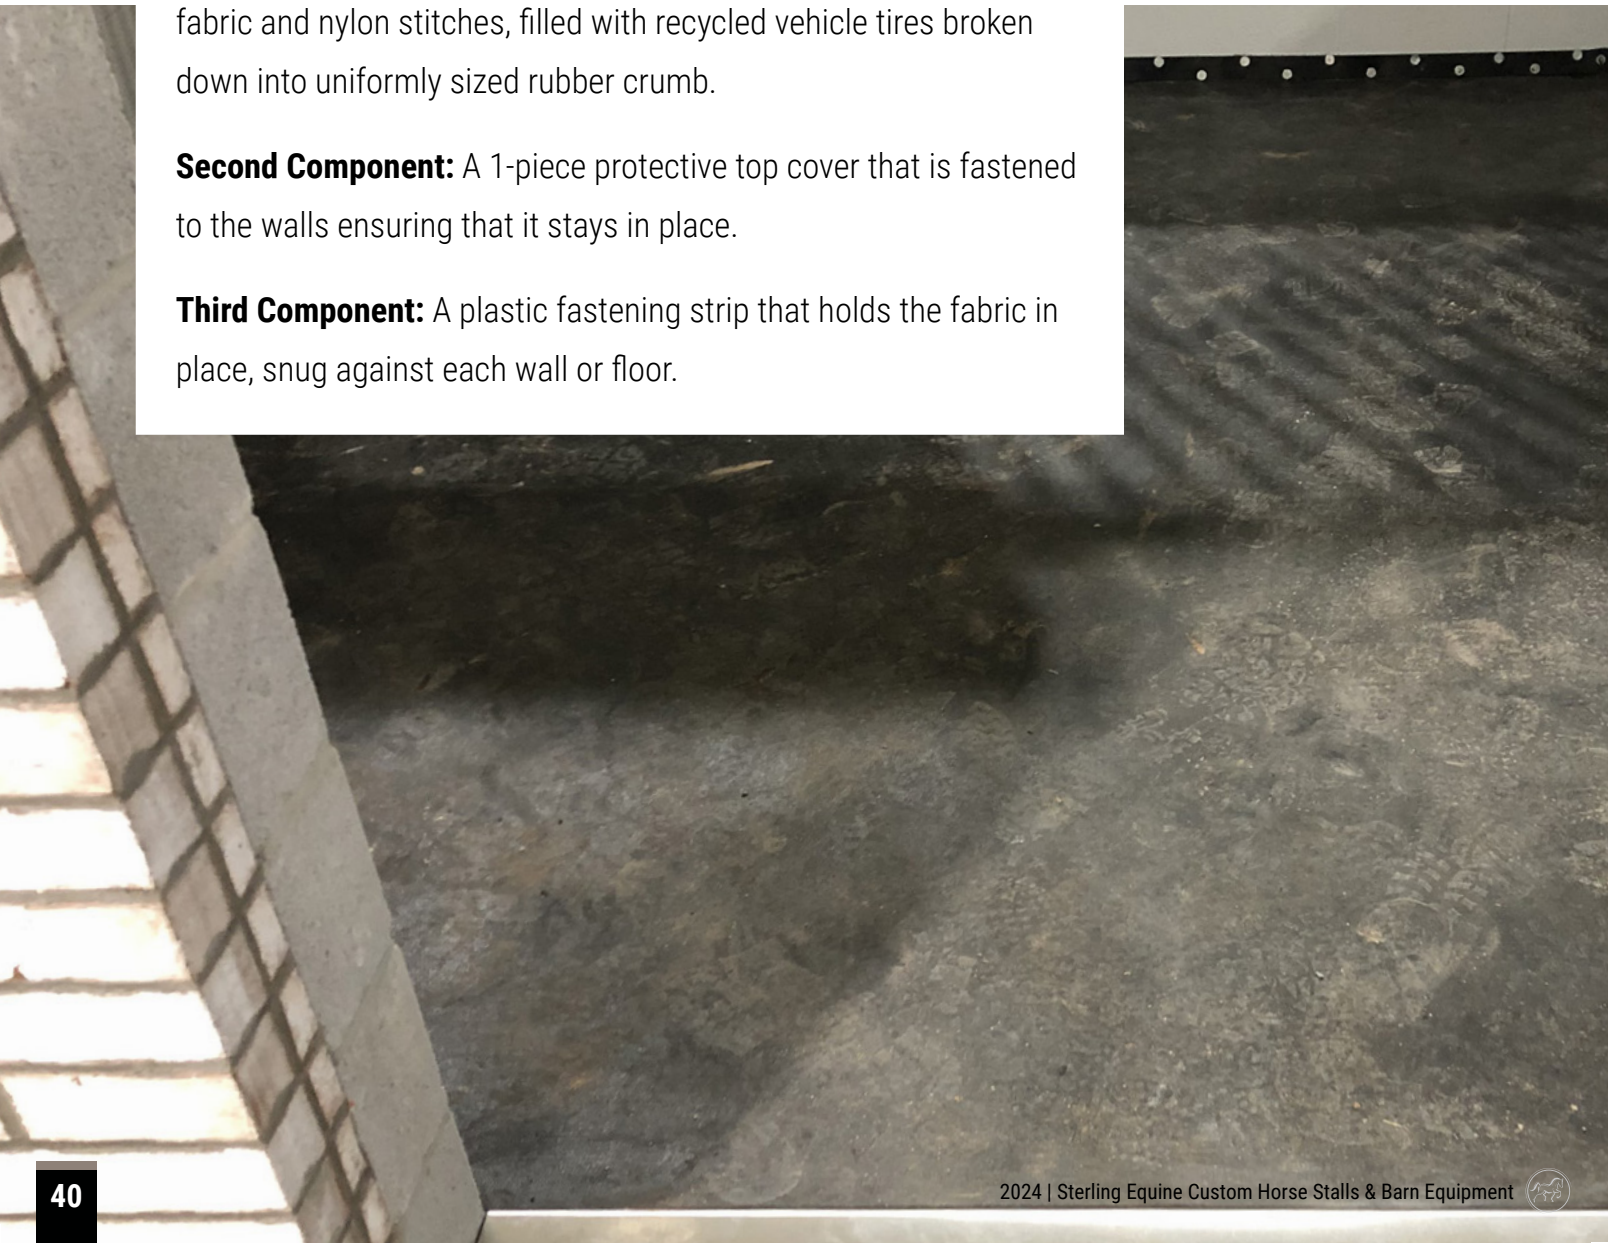

StableComfort is a revolutionary horse stall flooring system offering superior health, comfort, cleanliness and performance, making it the true global standard in equine flooring.

StableComfort System Components

First Component: A multi-celled mattress made from polypropylene fabric and nylon stitches, filled with recycled vehicle tires broken down into uniformly sized rubber crumb.

Second Component: A 1-piece protective top cover that is fastened to the walls ensuring that it stays in place.

Third Component: A plastic fastening strip that holds the fabric in place, snug against each wall or floor.

Additional OPTIONS

- Upgrade to a $\frac{3}{4}$ " premium pad thickness
- Add StallWall, featuring 1- $\frac{1}{2}$ " thick foam panels and a durable top cover

INTERLOCKING RUBBER MATS

Interlocking rubber mats offer quick installation and the potential for additional expansion. When placed on a solid, smooth base, mats will lie flat without curling, buckling, or rolling. Built with durability in mind, mats are abrasion-resistant and offer excellent traction.

Features & BENEFITS

- $\frac{3}{4}$ " thick & $\frac{1}{2}$ " thick
- Common stall size kits and custom sizes available
- 100% American Made
- Made with heavy duty re-vulcanized rubber (not glued or pressed)
- 100% closed cell is completely non-absorbent, antibacterial & antifungal
- Insulates against cold and dampness
- Won't roll, buckle, or curl
- Reduces bedding expenses
- Has been tested and approved by the American Farrier Association to be used for all hot- or cold-shoeing processes

ACCESSORIES

BARN LIGHTING

Sterling Equine offers a wide range of LED lighting solutions for your barn.

- Energy Efficient – save up to 60-80% on energy costs
- Safe for animal and human eyes (EN62471 tested)
- No ballasts to replace or repair
- IP65 rated for indoor/outdoor use and against dust particles and low-pressure washers
- Fixtures are UL-certified for wet locations
- Available in 4', 8', or 2' x 4' configurations

FEEDING & WATERING

We proudly distribute Nelson Manufacturing horse waterers and feeding systems. With their sleek look and highly functional design, Nelson products will not disappoint. Our available options include both pasture and stall watering and feeding systems, and our team will be happy to assist you in choosing the right system(s) for your facility.

FANS & MISTING

Recirculation Fans

20" High Output Deluxe Basket Fan - Variable Speed

Features

- High-velocity air pattern with quiet operation
- Heavy gauge, corrosion-resistant, black powder-coated guards
- 2-year warranty
- Ceiling or wall mount available
- Option for wall mount variable speed control (Operate 1 to 3 fans per controller)

20" Heavy-Duty Industrial Basket Fan - 2-Speed

Features

- High-efficiency motor with pull chain
- Heavy gauge, corrosion-resistant, black powder-coated guards
- 2 year warranty
- Ceiling or wall mount available

MISTING SYSTEMS

Features

- Stainless steel cross with 4 nozzles
- Attaches directly to fans
- Comes with a 6' hose

OUR PROCESS

PHASE ONE: DISCOVERY & DESIGN

Getting To Know You

The key to our process is building a detailed understanding of your unique vision and needs. Our team combines their personal and professional experience across multiple breeds and disciplines to ensure that your goals, preferences and budget are met. We delve into every detail: your horses' breeds and purpose, your facility's function and layout, and your personal design and aesthetic preferences.

Design Exploration

Together, we discuss, explore, and finalize a plan for your stalls. We're here to help you create a barn that suits your unique needs and can easily work in collaboration with architects, builders or contractors to ensure everything goes to plan.

Transparent Estimates

We provide a fully detailed estimate tailored to your individual project. If revisions are desired, they are fully discussed and agreed upon with clients prior to incorporation.

Adam Busse, Owner/Founder

PHASE TWO: PROJECT APPROVAL

Estimate Approval

When you're fully satisfied with the overall plans and estimate, your signature gives our team the green light to move forward.

Final Measurements

Though we have found that taking opening size measurements is fairly straightforward, we are here to help with ensuring accuracy. We will then provide you with final measurements based on the rough opening size of where the stalls will be placed.

Deposit and Scheduling

Upon securing a deposit and confirmation of measurements for your project, we add it to our production schedule and provide an overview of expected timelines. Please note that our typical manufacturing lead time is eight weeks.

PHASE THREE: INSTALLATION & BEYOND

Final Payment

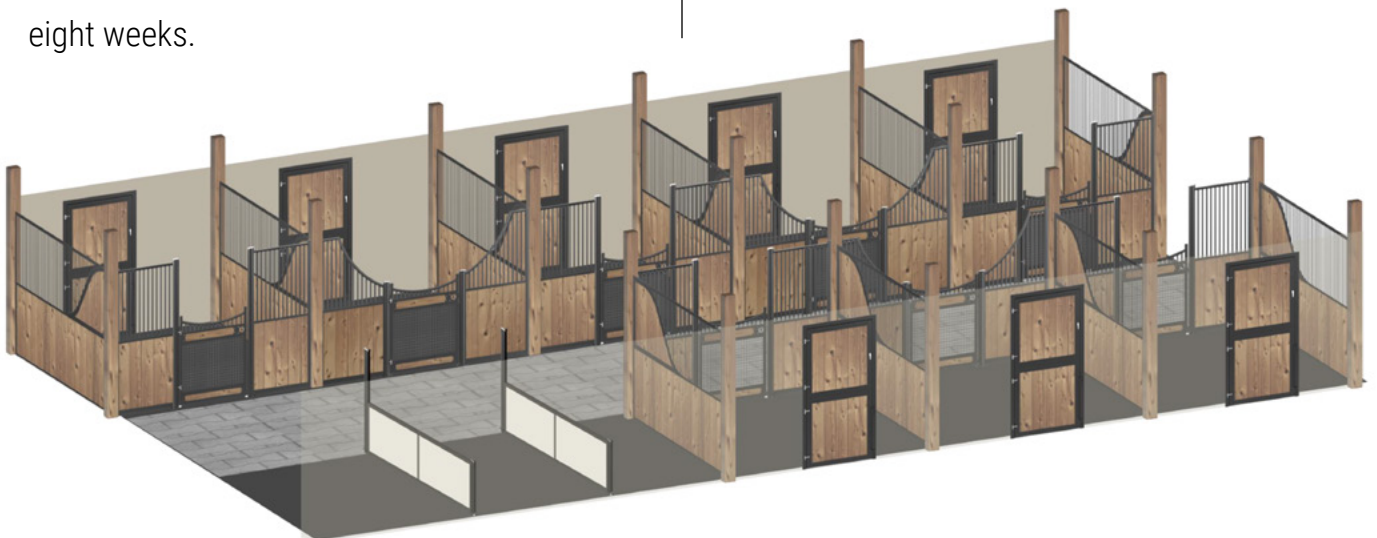

When your stalls and corresponding stabling equipment are complete, we will update you. Your final payment is due at this time.

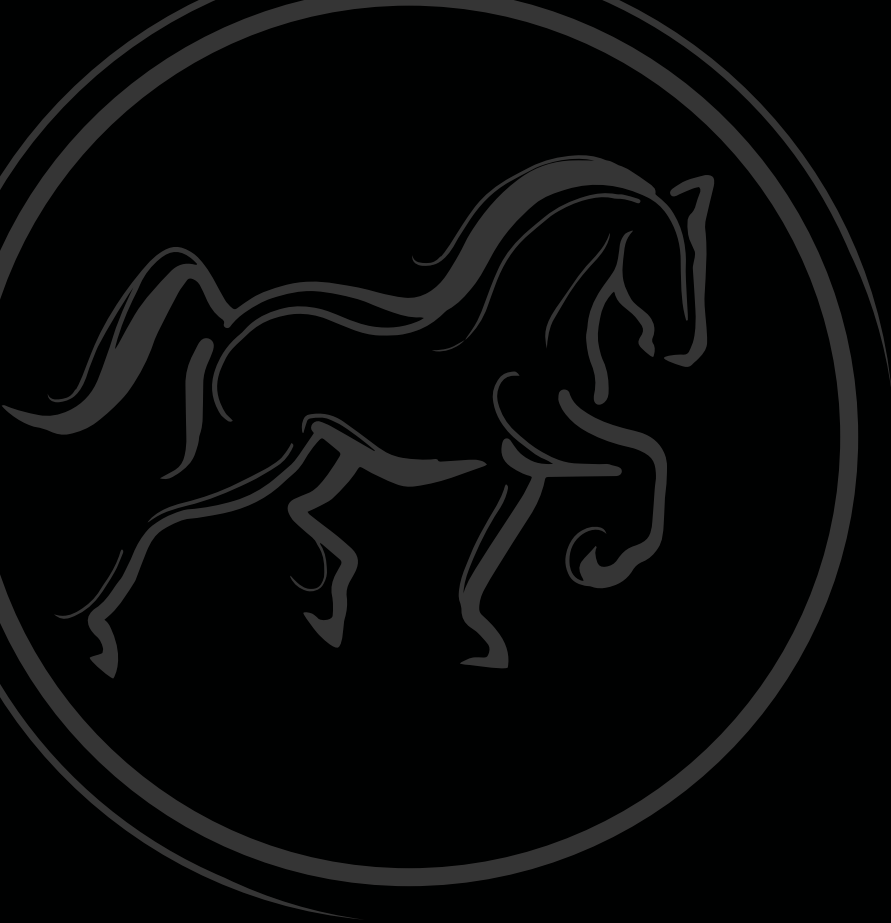

Shipping And Installation

Upon confirmed receipt of final payment, your carefully crafted stalls are shipped to you, along with installation guides for easy setup. Whether you choose to install them yourself or hire a local contractor, we're here to assist and answer any questions.

Support And Service

Our commitment to your satisfaction doesn't end with product delivery. We provide support and service for the lifetime of your stalls and equipment, including a 5-year structural warranty and a lifetime warranty on rollers.
